

Document reference: G-10 | Region: Global | Version: [TBD] | Effective date: [TBD]

WORKING DRAFT - PUBLICATION CONTROL: This document is drafted for the RedTree launch. Do not publish until the Global Compliance Matrix confirms the related launch implementation. Any text marked 'TBD BEFORE PUBLICATION' must be resolved and removed before release.

1. Ownership

Except for user content and identified third-party materials, RedTree software, source and object code, architecture, user interfaces, original graphics, documentation, texts, databases/structures, product names and other proprietary elements are owned by or licensed to SIMG SASU and are protected by applicable intellectual-property laws.

2. User content

Users retain ownership and other rights in their own content. The limited technical permission granted to SIMG is described in the Terms of Use and is only for providing requested RedTree functions.

3. Licence to use RedTree

The user's right to use RedTree is a limited software licence, not a transfer of ownership. The Terms of Use define permitted use and restrictions.

4. Trademarks and brand

RedTree and Xtree are trade marks used by SIMG SASU; registration is in progress. RedTree names, logos and distinctive brand elements may not be used in a manner that falsely suggests sponsorship, endorsement, affiliation or origin without permission. Nominative reference to RedTree remains permitted where lawful.

5. Third-party and open-source components

RedTree incorporates third-party software and libraries subject to their own licences. Applicable notices and licence texts will be made available in the app and/or on the RedTree legal site where required.

6. Copyright/IP complaints

A person who believes RedTree-hosted or RedTree-provided material infringes their rights may contact contact@thesimg.com | +33 (0)1 59 58 01 53 with enough information to identify the material and the claimed right. SIMG may request supporting evidence and will act as required by applicable law.

Third-party and open-source components

RedTree includes third-party and open-source components. The applicable licence texts and attributions are published alongside this notice.

TBD BEFORE PUBLICATION: the open-source notices must be generated from the build and published before release. Trade mark registration status must be confirmed before any statement of registered rights is made.
